

**Monecor (Europe) Limited (formally named Minden Investments and Insurance Advisers and Sub Agents Limited)**

**Key Information Document – CFD on Bonds**

**Purpose**

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

CFDs are provided by **Monecor (Europe) Limited**, (formally named Minden Investments and Insurance Advisers and Sub Agents Limited) authorised by the Cyprus Securities and Exchange Commission (“CySEC”) under license number 096/08.Call 00357 22 150666 or go to [www.etxcapital.com](http://www.etxcapital.com) for more information.

This document was created/last updated on 14<sup>th</sup> September 2019.

**You are about to purchase a product that is not simple and may be difficult to understand.**

**What is this product?**

**Type**

A contract for difference (“CFD”) is a leveraged contract entered with Monecor (Europe) Limited that allows an investor to speculate on rising or falling prices in a bond. CFDs on Bonds are derivative financial instruments traded Over the Counter (“OTC”), i.e. the trading is concluded outside a regulated exchange or venue and between the client and the Company, where the Company agrees to settle in cash the performance of the asset the client decides to speculate on

An investor has the choice to buy (or go “long”) the CFD to benefit from rising bond prices; or to sell (or go “short”) the CFD to benefit from falling bond prices. The price of the CFD is derived from the price of the underlying bond price. For instance, if an investor is long on German Bund Contract CFD and the price of the underlying bond rises, the value of the CFD will increase - at the end of the contract Monecor (Europe) Limited will pay the difference between the closing value of the contract and the opening value of the contract. Conversely, if an investor is long and the price of the underlying bond falls, the value of the CFD will decrease - at the end of the contract they will pay Monecor (Europe) Limited the difference between the closing value of the contract and the opening value of the contract. The leverage embedded within all CFDs has the effect of magnifying both profits and losses.

**Objectives**

The objective of the CFD is to allow an investor to gain leveraged exposure to the movement in the value of the underlying bond (whether up or down), without actually needing to buy or sell the underlying bond. The exposure is leveraged since the CFD only requires a small proportion of the notional value of the contract to be put down upfront as initial margin and is one of the key features of trading CFDs.

A future CFD has a pre-defined expiry date. As a result, there is no recommended holding period and it is down to the discretion of each individual investor to determine the most appropriate holding period based on their own individual trading strategy and objectives.

Failure to deposit additional funds in the case of negative price movement may result in the CFD being auto-closed. This will occur when losses exceed the initial margin amount. In the case of future CFDs, investors will be given the option to roll their existing contract into the next period – i.e., from a January expiry into a February expiry. Rolling is at the discretion of the investor but failure to do so will result in the CFD being auto-closed at the expiry date. Monecor (Europe) Limited also retains the ability to unilaterally terminate any CFD contract where it deems that the terms of the contract have been breached.

For more information and examples please see the Monecor (Europe) Limited website.

**Intended Retail Investor**

CFDs are intended for investors who have knowledge of, or are experienced with, leveraged products. Likely investors will understand how the prices of CFDs are derived, the key concepts of margin and leverage and the fact that losses may

exceed deposits. Indeed, they will understand the risk/reward profile of the product compared to traditional share dealing. Investors will also have appropriate financial means and the ability to bear losses in excess of the initial amount invested.

## What are the risks and what could I get in return?

### Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 7 out of 7, which is the highest risk class. This rates the potential losses from future performance of the product at a very high level.

CFDs are leveraged products that, due to underlying market movement, can generate losses rapidly. Losses can exceed the amount invested and you may be required to deposit additional funds. There

is no capital protection against market risk, credit risk or liquidity risk. On times of high volatility or market/economic uncertainty, values may fluctuate significantly and adversely affect the client's positions. In addition, it should be emphasized that such fluctuations are even more significant in case of leveraged positions. The risks included in this paragraph are non-exhaustive and that a comprehensive description of the risks involved can be found on the CIF's Risk Disclaimer document.

**Be aware of currency risk.** It is possible to buy or sell CFDs on a bond in a currency which is different to the base currency of your account. The final return you may get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

CFDs are complex instruments and come with a high risk of losing money rapidly due to leverage. **The majority of retail investor accounts lose money when trading CFDs.** You should consider whether you understand how CFDs work, and whether you can afford to take the high risk of losing your money.

Market conditions may mean that your CFD trade on a Bond is closed at a less favourable price, which could significantly impact how much you get back. We may close your open CFD contract if you do not maintain the minimum margin that is required, if you are in debt to the company, or if you contravene market regulations. This process may be automated.

This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment. However, you may benefit from a consumer protection scheme (see the section "what happens if we are unable to pay you"). The indicator shown above does not consider this protection.

### Performance scenarios

The scenarios shown illustrate how your investment could perform. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies and are not an exact indicator. What you get will vary depending on how the market performs and how long you hold the CFD.

The following assumptions have been used to create the scenarios in Table 1:

For example If an investor buys 1 CFD of a Bund, with a lot size of £1, with an initial margin of 20% with an underlying bond price of 162.170, the initial investment will be £3243.30 (20% x 162.170 x 1)\*100. The notional value is £16,217 (1 x 162.170 x 100). This means for every 1 hundredth point change in price of the underlying market the value of the CFD changes by £1. If the market decreases in value, for each hundredth point decrease in the market a £1 loss will incur.

Bond CFD			
opening price:	(current price)	P	162.170
Trade size (per CFD):		TS	1
Margin %:		M	20%
Margin Requirement (£):		$MR = P \times TS \times M$	£3243.30
Notional value of the trade (£):		$TN = TS \times P$	£16,217

Table 1

<b>LONG</b>	Closing Price (Inc. Spread)	Price Change	Profit/Loss	<b>SHORT</b>	Closing Price (inc. spread)	Price Change	Profit/Loss
Performance Scenario				Performance scenario			
Favourable	164.603	1.5%	£243.26	Favourable	159.737	-1.5%	£243.26
Moderate	162.981	0.5%	£81.09	Moderate	162.981	-0.5%	£81.09
Unfavourable	159.737	-1.5%	-£243.26	Unfavourable	164.603	1.5%	-£243.26
Stress	154.062	-5%	-£810.85	Stress	170.279	5%	-£810.85

The figures shown include all the costs of the product itself. If you have been sold this product by someone else or have a third party advising you about this product, these figures do not include any cost that you pay to them. The figures do not take into account your personal tax situation, which may also affect how much you get back.

For more information and examples please see the Monecor (Europe) Limited website.

### What happens if Monecor (Europe) Limited is unable to pay out?

For CFDs, in case of our financial default you may seek compensation from the Investor Compensation Fund ("ICF") of Cyprus Investment Firms. The 90% of the cumulative covered claims of the covered investor, or the amount of €20.000, whichever is lower. ICF Rules apply, including with respect to your categorization and eligibility. In general, retail clients are covered by the ICF.

## What are the costs?

Trading a CFD on an underlying Bond incurs the following costs:

This table shows the different types of cost categories and their meaning		
One-off entry or exit costs	Spread	The difference between the buy price and the sell price is called the spread. This cost is realised each time you open and close a trade.
	Currency conversion	Any cash, realised profit and losses, adjustments, fees and charges that are denominated in a currency other than the base currency of your account, will be converted to the base currency of your account and a currency conversion fee will be charged to your account.
Incidental costs	Distributor fee	We may from time to time where permitted by applicable law share a proportion of our spread, commissions and other account fees with other persons including a distributor that may have introduced you.
Other costs	Rollover costs	We charge you to roll over a futures contract into the next month or quarter, equal to half the applicable spread to open and close a trade.

## Tax Considerations

As a trader, all profits are deemed as taxable income. You are then taxed on profits at your marginal tax rate. Monecor (Europe) Ltd does not provide yearly tax statements or any information about tax. For further tax considerations, please consult your financial adviser or tax consultant.

## How long should I hold it and can I take money out early?

CFDs are intended for short or longer term trading, in some cases intraday and could be suitable for long term investments. There is no recommended holding period, no cancellation period and therefore no cancellation fees. You can open and close a CFD on a bond at any time during market hours.

## How can I complain?

If you wish to make a complaint, you should contact our Client Management Team on 00357 22 150666, by emailing [enquiries@etxcapital.com](mailto:enquiries@etxcapital.com) or in writing to Mezzanie Floor, 62 Athallas Avenue, Strovolos 2012, Nicosia, Cyprus. If you do not feel that your complaint has been resolved satisfactorily, you can refer your complaint to the Financial Ombudsman of the Republic of Cyprus. For more information please visit <http://www.financialombudsman.gov.cy>. Alternatively, you may submit your complaint to the CySEC at <http://www.cysec.gov.cy/en-GB/complaints/how-to-complain/> or other competent authorities. You may refer to the relevant Cypriot Courts or Alternative Dispute Resolution (ADR) mechanisms. For further clarifications please refer to our Complaints Handling Policy. Complaints submitted to CySEC are taken into consideration by the CySEC in the performance of its supervisory mandate.

## Other relevant information

If there is a time lag between the time you place your order and the moment it is executed, your order may not be executed at the price you expected. Ensure your internet signal strength is sufficient before trading.

The Terms and Policies section of our website contains important information regarding your account. You should ensure that you are familiar with all the terms and policies that apply to your account.
